ATTENDANCE MATRIX

Three attendance matrices have been included to provide a better understanding of where students reside and where they attend school. Remember, DDP projections are based upon where the students reside, not where they attend school. DDP uses the actual location where the students reside, as opposed to their school of enrollment, in order to provide the most accurate prediction of future facilities adjustments. Therefore, since the projections are based upon where the students reside, the figures used as a base for each school's resident projection may differ from the actual reported enrollment for each school.

These attendance matrices act as a check and balance for student accounting. They show where the students reside (in what School of Residence) based upon our address matching capabilities and what school they attend (School of Attendance) based upon data in the student file supplied by the District. The inclusion of these matrices is essential to showing how the students used in the projections match up to the District's records of enrollment for each school. The best way to plan for future facilities changes is to know where the next group of students will be residing, not necessarily which school they are currently attending.

READING THE MATRIX

Looking at the K-6 Attendance Matrix on the following page, let's begin with Bayview as an example. Following down the first column with the Bayview heading, there are 521 students that attend Bayview and reside in the Bay view attendance area. Continuing downward, 0 students attend Bayview but reside in the Castro attendance area. Next the matrix shows that 0 student attend Bayview but resides in Chavez's attendance area, and so on.

The row "TK students" refers to the number of TK students (24) attending Bayview. The row "Out of District" refers to students who live completely outside of the West Contra Costa Unified School District, but attend one of the District's schools. There are no Out of District students attending Bayview. "Unmatched" refers to students not geocoded due to address problems. There is one unmatched student attending Bayview. "Total Students Attending" shows the total number of students enrolled each school regardless of where they reside, and reflects the District's enrollment counts for each school. There are a total of 685 students attending Bayview Elementary School.

The next step is to read across the matrix, beginning with the Bayview attendance area row. We know that 521 represents the total number of students who reside in the Bayview Attendance area and attend Bayview. The next column, Castro, refers to the number of students who reside in the Bayview attendance area but attend Castro. There are currently 5 students residing in the Bayview attendance area but attend Castro Elementary School

The "Total # of Students Residing" column (left side) is the total number of students living in each particular attendance area. There are 813 students residing in the Bayview Attendance area. The "Total # of Students Residing" row is the actual number of students used in the Fall 2012/13 projections as the base number for each attendance area. Please review **Section Four** for the breakdown by grade of students residing in each attendance area.
