July 27: CBOC Meeting, FOC, 6:00 PM

August 2: Board Study Session regarding Adams property, 6:00 PM, DeJean

Response to Contra Costa County 2015-16 Grand Jury Report 1604 – Steve Collins

Effective January 1, 2015, California law Senate Bill (SB) 1266 requires all public schools to stock epi-phrine auto-injectors (pens). Schools must provide pens to school nurses or trained personnel who have volunteered to administer them to students who are suffering or reasonably believed to be suffering from a severe allergic reaction.

The Grand Jury Report concerns implementation of this law by the public schools in the County and their compliance with it. The Grand Jury mailed surveys in November 2015 to Contra Costa K-12 public schools in eighteen districts, 243 schools in all. The Grand Jury evaluated the following four responses from each school to determine compliance with the law:

- How many regular EpiPens are on hand for emergency use at your school?
- How many EpiPen Jr are on hand for emergency use at your school?
- How many trained volunteers or nurses can administer the EpiPen® at your school?
- Does your school have a prescription for EpiPens on file?

Based upon this, the Grand Jury came out with the Report “are Our Schools in Compliance with the ‘EpiPen’ Law, SB 1266 – It could be a matter of ‘Live or Death’”. The report included Findings and Recommendations (page 6 of the report). Each district within Contra Costa County had to respond to the “Required Responses” (page 8 of the report).

Attached you will find the full Grand Jury Report 1604 and the District’s response to the “Required Responses” for the West Contra Costa Unified School District.

Fairmont School Non-Resident Transfers – Steve Collins

At the school board on Wednesday, July 20, 2016, there was a request for the number of non-resident transfer students attending Fairmont school. Listed below are the approved number of non-resident transfers for the last three years and a breakdown of the current number of non-resident students for 2016-17.

Approved Transfers at Fairmont for the Past Three Years

Grade	2014-15	2015-16	2016-17
K	1	0	0
1	1	1	0
2	5	2	0
3	2	2	0
4	4	5	0
5	1	2	2
6	0	3	0

Active Transfers at Fairmont for 2016-17

Grade	# of Transfers
K	1
1	0

2016 Chinese International Student Exchange Program – Steve Collins

The International Student Exchange Program is a product of a collaboration between the District and the City of Richmond. Its purpose is to engender the development of an increased global 21st century focus in our District and community. The development of the Program for the District has been project managed by Dr. Eric Peterson. The Program is planned to be composed of both short term exchange programs and a full school year program. In April 2016, the District submitted a petition, which is currently pending to the federal Student Exchange Visitor Program, to become authorized to enroll nonresident “international students” on F-1 visas in District high schools for full school year terms. The District previously was authorized to enroll nonresident students on F-1 visas and did so until 2005. Nonresident students that attend on F-1 visas will be required to reimburse the District for the cost of their education. The Program will initially be focused primarily on academic and cultural exchange with students and teachers from China but is planned to later incorporate other countries as it develops.

The District’s first short term Summer International Student Cultural Exchange Program was conducted between June 27 and July 15, 2016 at De Anza High School in Richmond. It was attended by a total of 85 visiting Chinese secondary students and their teachers from Shanghai Shangde Experimental School, a large K-12 school that Dr. Eric Peterson visited in March 2016 on behalf of the District. Twenty local students also participated. The local students took part in the cultural exchange program activities while also serving as local ambassadors and language models for the Chinese students. The District teachers and administrators that implemented the summer program were Angela Lara, Amanda Rodriguez, Rich Seeber, Joanne Sundberg, and Dr. Eric Peterson. Feedback from those involved in the summer program was highly positive. District students that attended have requested to participate again in the future and the Chinese school requested to continue the program. The school also invited the District to send a delegation to come visit in China.

The cost for the Summer Program, including the cost for local students to attend, was paid by Sunny Ivy Education under the terms of an MOU with the District. Sunny Ivy Education also helped arrange for the Chinese students’ visas, field trips, and diverse local homestay families to host the students.

Local students benefited in various ways through their participation in the Program. Most of the local students that attended had never previously had a chance to get to know a student from

West Contra Costa Unified School District
Office of the Superintendent

China. Local students also had a chance to share their own diverse personal cultures with the Chinese students. The local and Chinese students quickly learned they had much in common, and many clearly developed friendships. The Program afforded local students, most from Title 1 schools, the opportunity to build broader global understanding on a personal level that they may not have had otherwise.

The Program culminated with a closing ceremony on the afternoon of July 15. At the event, Richmond Councilperson Mr. Nate Bates presented the District with a certificate of appreciation from the City for the District's support of the program. The Chinese students and faculty expressed appreciation for the warm welcome they received from the City and District. The program fulfilled its stated objectives. It built greater cross cultural understanding between the Chinese students/faculty and the diverse District and community stakeholders that were involved. The students from China also demonstrated increased proficiency in their use of English and a greater understanding of the U.S. educational system. In addition, Chinese students in the program expressed interest in returning to the District for long term study as exchange students.

Re: *Response to Contra Costa County 2015- 2016 Grand Jury Report 1604*

Dear Mr. Simmons:

The West Contra Costa Unified School District has reviewed the findings and recommendations of the Contra Costa County 2015-2016 Grand Jury Report 1604. The District intends to fully comply with SB 1266 to ensure that all schools are stocked with epinephrine auto-injectors (Pens) and that appropriate staff are trained to administer them to students who are suffering, or reasonably believed to be suffering from, a severe allergic reaction. The District's response to the findings and recommendations of the Grand Jury Report is below.

F1: Mylan Specialty Division supplies pens at no cost to public schools in the district

District Response to F1: West Contra Costa Unified School District (WCCUSD or the District) is not using Mylan Specialty Division at this time to acquire no cost EpiPens. The Pens are being provided, instead, at no cost to the District by Meridian Medical Technologies, Inc.

F2: Mylan Specialty Division will replace Pens at public schools in the district that have expired at a discounted cost.

District Response to F2: WCCUSD is not using Mylan Specialty Division at this time to replace expired EpiPens. The pens are being replaced, instead, at no cost to the District by Meridian Medical Technologies, Inc.

F3: FARE and CDC statistical information project a range of 4 percent to 7.7 percent of students (7,200 to 13,850 out of the estimated 180,000 students in Contra Costa County's eighteen school districts) that may have an allergy that is unknown to parents and undiagnosed.

District Response to F3: WCCUSD projects that a range of 4 percent to 7.7 percent of its approximately 29,000 students may have an allergy that is unknown to parents and is undiagnosed. The District is addressing this issue by following the requirements of SB 1266 including, but not limited to, ensuring that staff at school sites are trained to identify symptoms of anaphylaxis and to administer EpiPens.

F5: SB 1266 does not clearly address the use of Pens at off-campus school activities or events.

District Response to F5: WCCUSD presently directs site administrators to designate a trained staff member to carry an EpiPen on school field trips.

F7: SB 1266 does not require follow up procedures for reporting the use of a Pen.

District Response to F7: WCCUSD has developed a protocol for site administrators to follow to report the use of a Pen.

F9: It is unknown whether all of the schools in West Contra Costa Unified School District are in compliance with SB 1266.

District Response to F9: WCCUSD will ensure that the District, including all school sites, is in compliance with SB 1266. The District schools that did not provide sufficient information to the Grand Jury have been verified in compliance by the District. These schools are (with date of verification of initial compliance by the District): El Cerrito High 4/13/15, Richmond High 1/4/16, Downer Elementary 2/2/15, Dover Elementary 10/13/14, Korematsu Middle 9/14/15 and Ellerhorst Elementary 1/7/2015. On the dates that the District verified compliance, the schools were trained in SB 1266 requirements, EpiPen administration, and provided EpiPens. Expired EpiPens were replaced in all district schools in May 2016 when reverification of compliance was completed. All elementary schools have two adult strength and two junior strength Pens. All secondary campuses have been provided four adult strength Pens. The WCCUSD is also complying with the requirements of SB 1266, in addition to the individual school sites.

R1: The West Contra Costa Unified School District should contact those schools within their district and verify the schools are in compliance with SB 1266.

District Response to R1: WCCUSD contacted all schools within the District in May 2016 and reverified that they are all in compliance with SB 1266. The District will continue to verify the compliance of all schools at least once per year.

R3: Each of the School District Boards should direct the School District Superintendent to contact all schools in their district at the start of each school calendar year to confirm that they are compliant with the requirements of SB 1266.

District Response to R3: The Board of WCCUSD will direct the District Superintendent to contact all schools in the District at the start of each school calendar year to confirm that they are compliant with the requirements of SB 1266.

R4: Each of the School District Boards should direct the School District Superintendent to report to the Board at the start of each school calendar year that the School District is compliant with the requirements of SB 1266.

District Response to R4: The Board of WCCUSD will direct the District Superintendent to report to the board at the start of each school calendar year to confirm that all schools in the District are compliant with the requirements of SB 1266.

R8: The School Districts should consider the practical and legal issues of supplying Pens for field trips and other off-site school events, and working with school nurses to develop policies and procedures for their use at these events.

District Response to R8: WCCUSD will continue to consider the practical and legal issues of supplying Pens for field trips and other off-site school events. The school nurses of the District have already created policies and procedures for the use of EpiPens on school field trips. The District will consider whether and how to provide Pens at other off-site school events.

R10: The School Districts should consider working with school nurses to develop policies and procedures for reporting the use of Pens.

District Response R10: WCCUSD is continuing to work with its school nurses to develop policies and procedures for reporting the use of Pens. The District has already created a protocol for reporting the use of Pens which is in use.

R12: The School districts should consider helping parents understand the risks of anaphylaxis and the protocols in place for emergency administration of epinephrine. The School Districts should consider "identifying funds" to carry out these activities.

District Response to R12: The District has decided to offer trainings at the biannual Parent University organized by the Special Education Department (this event is open to all parents regardless of whether their child has a disability) to help parents understand the risks of anaphylaxis and the protocols in place for emergency administration of epinephrine. The District has identified parent education funds for this purpose. The District will also consider additional strategies to help parents understand the risks of anaphylaxis and the protocols in place for emergency administration of epinephrine.

Please let me know if you have any questions regarding the District's response. I can be reached by email at scollins@wccusd.net or by phone at (510) 307-4633.

Sincerely,

Steve Collins

Contra Costa County Grand Jury Report 1604

Are Our Schools in Compliance with the "EpiPen" Law, SB 1266?

It Could be a Matter of "Life or Death"

TO: Contra Costa County Superintendent of Schools, Contra Costa County Office of Education; District School Boards for Acalanes Union High, Antioch Unified, Brentwood Union, Byron Union, Canyon, John Swett Unified, Knightsen Elementary, Lafayette, Liberty Union High, Martinez Unified, Moraga, Mt. Diablo Unified, Oakley Union Elementary, Orinda Union, Pittsburg Unified, San Ramon Valley Unified, Walnut Creek, and West Contra Costa Unified

SUMMARY

Effective January 1, 2015, California law Senate Bill (SB) 1266 requires all public schools to stock epinephrine auto-injectors (Pens). Schools must provide Pens to school nurses or trained personnel who have volunteered to administer them to students who are suffering, or reasonably believed to be suffering from, a severe allergic reaction.

This report concerns implementation of this law by public schools in the County and their compliance with it. Most but not all schools are in compliance, although not all schools responded to the investigation.

Recommended actions include:

- o Annual verification of K-12 public schools compliance under SB 1266
- o Determining the practical and legal issues related to Pen use at offsite school events
- o Determining the practical and legal issues related to Pen use at pre-schools under the direction of Contra Costa Office of Education

METHODOLOGY

The Grand Jury:

- o Conducted a mail survey of Contra Costa's eighteen public school districts (K-

- 12)--243 schools in all. Contra Costa County Office of Education schools (i.e., juvenile detention facilities) and charter schools were not included in the survey.
- o Conducted telephone interviews with BioRidge Pharma, the order processor for Pens
 - o Reviewed the California School Nurses Organization (CSNO) website
 - o Conducted on-site school visits

CONFLICT DISCLAIMER OF INTEREST

One or more Grand Jurors recused themselves due to a possible conflict of interest and did not participate in the investigation, preparation, or approval of this report.

BACKGROUND

Sending a child off to school each morning requires daily preparation – a computer with today's homework, permission slips, gym shoes, lunch and most importantly, for a child with severe allergies, allergy medication.

Anaphylactic shock is a severe allergic reaction. A recent law, SB 1266, defines anaphylactic shock as a potentially life-threatening hypersensitivity to a substance. A severe allergic reaction can restrict airways in the lungs, severely lower blood pressure, and cause suffocation by swelling of the tongue or throat. Food is the most common allergen. Other common allergens (or triggers) include biting or stinging insects, medications, and latex. At times, the trigger is unknown.

According to Food Allergy Research & Education (FARE), a national nonprofit organization, anaphylaxis affects one in every thirteen children under eighteen or an average of two children in every classroom. The Center for Disease Control and Prevention (CDC) reports this number to be one in every twenty-five children and says that about one in every four students that have a severe and potentially life-threatening reaction at school had no previously known food allergy. The CDC reports that food allergies are on the rise. A study released in 2013, revealed that food allergies among children:

- o Are the leading cause of anaphylaxis outside the hospital setting;
- o Increased approximately fifty percent between 1997 and 2011;
- o Resulted in 300,000 ambulatory-care visits a year among children under eighteen; and
- o Cost nearly twenty-five billion dollars per year.

Epinephrine (adrenaline) is a medication that can reverse anaphylactic shock. It is administered as a shot using an auto-injector, often referred to as a "Pen". According to the National Food Allergy Association guidelines, epinephrine is the first-line of treatment for life-threatening allergic reactions. A delay of minutes in administering epinephrine can result in death. Hospitals admit about 9,500 children each year for some form of food allergy.

To assist public schools in responding to instances of anaphylactic shock, the California legislature passed SB 1266, which adds section 4119.2 to the Business and Professions and Education Code and section 49414 to the Education Code. The new law requires school districts, county offices of education and charter schools to provide Pens to school nurses and other personnel trained in the use of such Pens.

Additionally, each private elementary and secondary school in the State may voluntarily determine whether to make emergency Pens and trained personnel available at its school.

DISCUSSION

SB 1266, which became effective January 1, 2015, requires, rather than simply allows, California public schools, county offices of education and charter schools to stock Pens. Schools must provide Pens to school nurses or trained personnel who have volunteered to administer them to students who are suffering, or reasonably believed to be suffering from, an anaphylaxis reaction.

In the County, there are approximately 180,000 students at K-12 public schools, special education classes offered the local education agency, charter schools, and Horizon schools. Over 1,200 of these students have their own epinephrine injectors kept in their school's emergency medical cabinet. However, there likely are many more who have an allergy, but that allergy is unknown to their parents or caregivers. While the estimates vary of those students with allergies unknown to their parents or caregivers, a reasonable range for such students in the County is somewhere between 6,000 students (based on the CDC's number of one in twenty-five experiencing an allergic reaction) to 12,650 students (based on FARE estimates of one student in thirteen).

SB 1266 and What it Means

SB 1266 requires all California public schools, the county office of education and charter schools to:

- o stock epinephrine auto injectors in case of student emergency; and
- o train school nurses or at least one volunteer to administer Pens to students who are suffering or reasonably believed to be suffering from an emergency anaphylaxis reaction.

The law also requires the Superintendent of Public Instruction to establish minimum standards of training for the administration of epinephrine auto-injectors. The standards must be based on commonly accepted standards and the Superintendent must review the adequacy of the standards at least once every five years.

Public schools, county offices of education and charter schools must keep and maintain prescriptions up-to-date for Pens. As of November, all of Contra Costa public school districts had a prescription for Pens on file.

The law's only concerns Pen use at a public school or county office of education school. The California School Nurses Organization's (CSNO) website, as revised March 2015, states:

"The law does not address field trips or other off site school activities. CSNO recommends that school nurses work with their districts to develop policies and procedures that address activities outside of the school site, considering school nurse staffing and other challenges with regards to evenings and weekends."

Additionally, early childhood education centers, identified, as California Preschool Instructional Network by the Contra Costa Board of Education, are not required to stock Pens. FARE research estimates that nearly six million or eight percent of children (nationally) have food allergies – young children are most affected. Casual exposure to allergens presents a greater risk to young children who frequently put their hands in their mouths. Depending on the amount of contact and the location of the contact, these reactions are occasionally more serious. Failure to promptly treat food anaphylaxis with epinephrine is a risk factor for fatalities.

Training of Staff and Volunteers

Each school may designate one or more school volunteers be trained to administer Pens. Volunteers must receive an initial training as well as annual refreshers. SB 1266 establishes that training shall include all of the following:

- o Techniques for recognizing symptoms of anaphylaxis.
- o Standards and procedures for the storage, restocking, and emergency use of epinephrine auto-injectors.
- o Emergency follow-up procedures, including calling the emergency 911 telephone number and contacting, if possible, the pupil's parent and physician.
- o Recommendations on the necessity of instruction and certification in cardiopulmonary resuscitation
- o Instruction on how to determine whether to use an adult epinephrine auto-injector or a junior epinephrine auto-injector, which shall include consideration of a pupil's grade level or age as a guideline of equivalency for the appropriate pupil weight determination. Additionally, the training must be consistent with the most recent Voluntary Guidelines for Managing Food Allergies in Schools and Early Care and Education Programs published by the Federal Centers for Disease Control (CDC) and Prevention. The current CDC guidelines recommend:
 - o Accommodations or services needed for the allergic child to be safely included in activities like allergen-free classrooms and allergy-friendly seating arrangements.
 - o Provision of instructions for treatment of allergic reaction posted in the cafeteria, establishment of designated allergy-friendly seating during meals (open to any child eating foods free of identified allergens), rapid access to epinephrine auto-injectors in cases of food allergy emergency, and training in use for staff.

The law also states:

"A school district, county office of education or charter school shall ensure that each employee who volunteers will be provided defense and indemnification by the school district, county office of education or charter school for any and all civil liability. The school district, county office of education or charter school must also notify each volunteer that the volunteer is being provided with defense and indemnification for any and all civil liability associated with administering epinephrine auto-injectors."

Procurement and Funding of Pens

Schools receive two boxes of Pens at no charge once per calendar year from Mylan Specialty, the manufacturer. Schools that have used the Pen for an emergency may receive replenishment Pens from Mylan Specialty at no cost if they complete a replenishment form detailing the incident resulting in Pen use. If the Pen expires, schools may order more at a discount. The Pen has a shelf life of twelve to eighteen months.

CSNO recommends that school nurses work with school districts to develop and implement documentation procedures ensuring proper care, follow-up, and the replenishment of medications in a timely manner. Additionally, CSNO suggests the information to be reported to the CSNO website at:

<http://www.csno.org/step-up-and-be-counted.html>

Survey of Schools to Monitor Compliance

The Grand Jury mailed surveys in November 2015 to Contra Costa's K-12 public school in eighteen districts, 243 schools in all. The Grand Jury evaluated the following four responses from each school to determine compliance with the law:

- o How many regular EpiPens® are on hand for emergency use at your school?
- o How many EpiPen Jr® are on hand for emergency use at your school?
- o How many trained volunteers or nurses can administer EpiPen® at your school?
- o Does your school have a prescription for EpiPens® on file?

The following schools were not in compliance with SB 1266 as of March 2016:

Antioch Unified School District

Mission Elementary

Live Oak

Kimball Elementary

Antioch High

Prospect High Alternative

Bridges

Fremont Elementary

Belshaw Elementary

Bidwell Continuation High

The Grand Jury had insufficient information to complete its evaluation of the following schools as of March 2016:

West Contra Costa Unified School District

El Cerrito High	Dover Elementary
Richmond High	Korematusu Middle
Downer Elementary	Ellerhorst Elementary

FINDINGS

- F1. Mylan Specialty Division supplies Pens at no cost to public schools in the district.
- F2. Mylan Specialty Division will replace Pens at public schools in the district that have expired at a discounted cost.
- F3. FARE and CDC statistical information project a range of 4 percent to 7.7 percent of students (7,200 to 13,850 out of the estimated 180,000 students in Contra Costa County's eighteen school districts) that may have an allergy that is unknown to parents and undiagnosed.
- F4. Over 1,200 students in Contra Costa County's eighteen school districts have Pens with their names located in the school emergency medicine cabinet.
- F5. SB 1266 does not clearly address the use of Pens at off-campus school activities or events.
- F6. SB 1266 does not cover California Preschool Instructional Network centers.
- F7. SB 1266 does not require follow up procedures for reporting the use of a Pen.
- F8. After more than a year, one or more schools in the Antioch School District are not in full compliance with SB 1266.
- F9. It is unknown whether all of the schools in the West Contra Costa School District are in compliance with SB 1266.

RECOMMENDATIONS

- R1. The West Contra Costa Unified School District should contact those schools within their district and verify the schools are in compliance with SB 1266
- R2. The Antioch Unified School District should contact those schools found not to be in compliance with SB 1266 and ensure they become compliant by the beginning of the 2016-2017 School year.

- R3. Each of the School District Boards should direct the School District Superintendent to contact all schools in their district at the start of each school calendar year to confirm that they are compliant with the requirements of SB 1266.
- R4. Each of the School District Boards should direct their School District Superintendent to report to the Board at the start of each school calendar year that the School District is compliant with the requirements of SB 1266.
- R5. The Contra Costa County Superintendent of Schools should contact his or her schools at the start of each school year to confirm that the schools are compliant with the requirements of SB 1266.
- R6. Contra Costa County Superintendent of Schools should consider reporting to the Board of the Contra Costa Office of Education at the beginning of each school calendar year the status of compliance of the County to SB 1266.
- R7. The Contra Costa Office of Education should consider recommending to the California Preschool Instructional Network that preschools within its network first evaluate the practical and legal considerations of administering Pens to students and, if permissible, follow the mandate set forth in SB 1266 as closely as reasonably possible.
- R8. The School Districts should consider the practical and legal issues of supplying Pens for field trips and other off-site school events, and working with school nurses to develop policies and procedures for their use at these events.
- R9. The Contra Costa Office of Education should consider the practical and legal issues of supplying Pens for field trips and other off-site school events, and working with school nurses to develop policies and procedures for their use at these events.
- R10. The School Districts should consider working with school nurses to develop policies and procedures for reporting the use of Pens.
- R11. The Contra Costa Office of Education should consider working with the Contra Costa Superintendent of Schools and school nurses to develop policies and procedures for reporting use of the Pens.
- R12. The School Districts should consider helping parents understand the risks of anaphylaxis and the protocols in place for emergency administration of epinephrine. The School Districts should consider "identifying funds" to carry out these activities.
- R13. The Contra Costa Office of Education should consider helping parents understand the risks of anaphylaxis and the protocols in place for emergency administration of epinephrine. The Contra Costa Office of Education should consider "identifying funds" to carry out these activities.
