District-wide Practice Test!

The Smarter Balance practice test for WCCUSD schools will be administered the week of 1/27-1/31.

Our goals for administering the test include: 1) to give staff and students practice with testing interface and technology, 2) to practice scheduling students through labs, and 3) to test our technology.

Students and staff will have a chance to experience the technology components and testing formats. Although the operational assessment system will be computer adaptive, the Practice Tests follow a fixed-form model. Students and teachers will not receive reports or scores from the Practice Tests.

Instructions for administering the practice test will be sent to Principals and Test Site Coordinators next week.
