

# Step 1:

## Start with the Popsicle stick.

# Step 2:

## Tape one piece of copper tape to each side.

## Step 3:

Take the LED light and put each end of the wires under the copper tape.

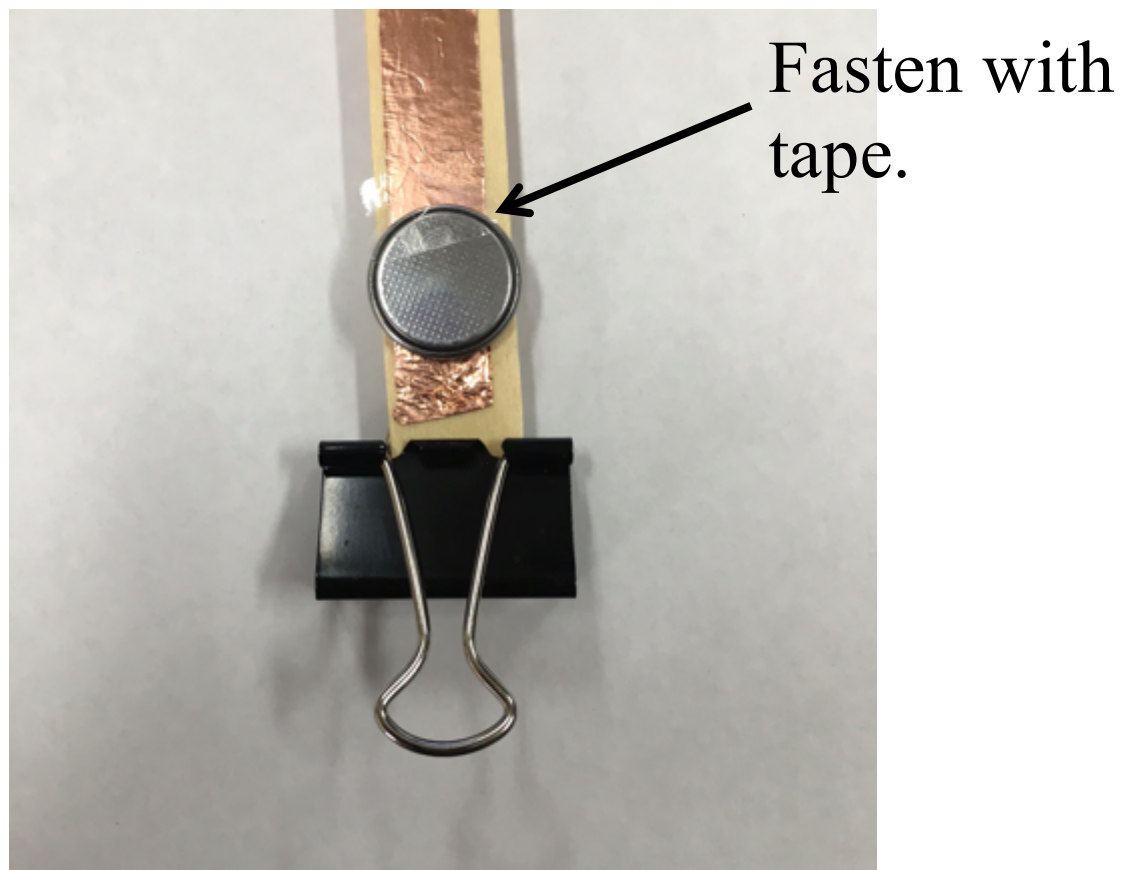

## Step 4:

Fasten the large paper clip to the opposite end of the Popsicle stick as the LED light.

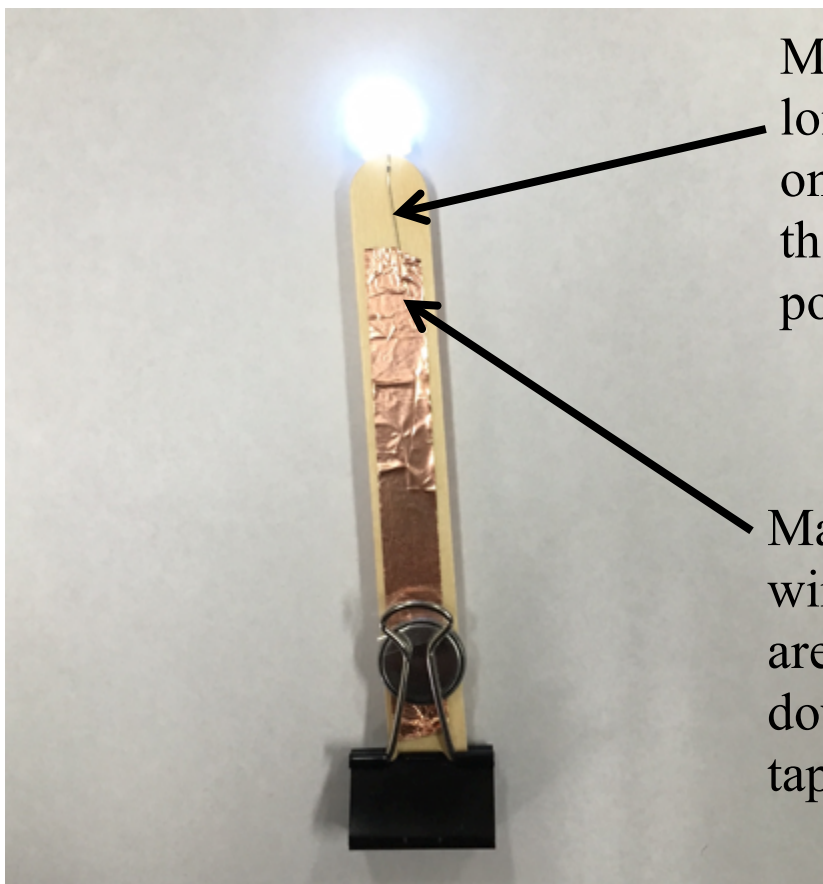

# Step 5:

Place the battery with positive side (+) down near end of copper tape.

# Step 6:

Push down the paper clip holder on each side to light the flashlight!

Make sure that the long end of the wire is on the same side as the battery facing positive side down.

Make sure that the wire ends of the LED are pressed completely down under the copper tape.
