

WCCUSD 2020 VISION: BLENDED OPTION MODEL

Pooled Home Schooling at Student Support Hubs

- All instruction is delivered in a distance learning approach. The “classroom” is with the teacher.
- Teachers can either be at home or in a classroom with limited high-need students to deliver instruction.
- Students are admitted to Student Support Hubs at schools with social distancing standards in place, in small cohorts with instructional aides, child care credentialed staff, before/after school workers, or credentialed teachers.
- Tiered admission to Student Support Hubs is done according to student-centered needs up to capacity and workforce demands.
- Need for coordinated intervention resources and personnel for high need students.
- Staffing Hubs with qualified facilitators will be a priority.
- Collaboration and negotiation with labor unions to reach consensus and resolve staffing and workload issues.
