

Mandarin Campus Update

- West County Mandarin Campus currently supports three grade levels and will continue to add a grade each year. The campus is quickly outgrowing the available space at their current Site.
- Adams MS Site has been identified as a potential option to build a temporary satellite campus for upper grades.
- Adams MS was closed in 2009. The major consideration for the Site is the Hayward fault line.
- The District is contracting for a geotechnical site investigation to determine the feasibility of building a Portable satellite campus at Adams.
- Historical site investigations that are available include:
 - *Structural Evaluation of Charles Adams Middle School, DASSE Design, Inc., October 17, 2002*
 - *Initial Feasibility for Workforce Housing at District Sites excerpt, DCG Strategies, May 24, 2018*
